|--------------------|---|
| Description | Interlocking rubber tiles are a type of flooring made from rubber material that can be locked together to create a stable and durable surface. They are commonly used in gyms, play areas, and other high-traffic areas due to their ease of installation, shock absorption, and slip-resistant properties. |
| Application | Gyms, fitness, and sports facilities, play areas, and educational facilities. |
| Material | 100% SBR |
| Thickness | 10mm |
| Tile Size | 50cm x 50 cm OR 1m x 1m |
| Colors | Black |

INTERLOCKING TILES - 10MM
